Florida, USA · Remote
Available now · contract, 30–40 hrs/week

I build websites, automations and AI agents for SaaS teams and small businesses.

FEATURED BUILD

Multi-tenant CRM migration engine — Construction-tech SaaS client (private)

- Moves a contractor's contacts, jobs and files into one app, on PostgreSQL with n8n workers.
- Every migration is resumable and auditable: it recovers from a crash mid-run without duplicates (tested on 5,000 contacts).
- AES-256-GCM credential encryption and tenant isolation; 288 automated tests, including a 32-test adversarial suite.

AUTOMATIONS

Voice receptionist demo. An AI phone assistant that answers calls for a real-estate business.

Lead pipelines. n8n lead-gen workflows and Google Workspace integrations for clients.

Security. Code security reviews and incident response, including removing malware that got into a client codebase through a compromised dependency.

WEBSITES

Local-SEO website rebuild · Mobile massage business — On staging
React, Vite and Tailwind, with a page per service and city, schema markup and a 301 redirect plan from the old site.

BuilderLync marketing site · Construction CRM — Concept
Multi-page redesign with a WebGL 3D city hero and a GSAP pinned-scroll "lead-to-invoice" sequence.

VIDEO

Video ads and motion. Two BuilderLync product ads, a Meavita furniture spot with 3D-tracked type, an Nvok.io kinetic-type promo and a 1:56 testimonial VSL. I can also cut the demo video for anything I build.

SKILLS & TOOLS

Automation & AI
n8n, AI agents and multi-agent workflows, voice agents, LLM APIs, Playwright, API and Google Workspace integrations

Backend & data
Node.js, Express, TypeScript, JavaScript, PostgreSQL (SQL), Supabase (edge functions)

Web
WordPress, React, Vite, Tailwind CSS, GSAP, WebGL; local SEO (schema, 301 redirects)

Ops & security
Servers and deployment, automated testing, code security reviews, incident response

Video & design
Premiere Pro, After Effects, FFmpeg, Photoshop, Figma, Blender

EDUCATION

High school diploma

Self-taught in video production, design and software development

LANGUAGES

English (native), Arabic (fluent)

EXPERIENCE

Freelance Developer, Video Editor & Motion Designer · Self-employed — 2023–Present

- Build WordPress sites, full-stack web apps, backends and server setups for small businesses and SaaS clients.
- Use AI coding agents to move faster, with automated tests to check the results.
- Edit video ads and motion graphics for brands, from TikTok ads to fully animated 3D sequences.

Developer & Content Manager · Autom8ion Lab, AI automation consultancy — 2025–2026

- Platform development, plus content strategy and production, including a retro infomercial for BuilderLync.
